COOL PROJECTS (See more on GitHub)

Running Man Game (github.com/Tricktionary/RunningManGame)

- A game developed in processing that requires the player to collect coins and solve puzzles in order to progress through the games stages as an AI tries to hunt you down

Personal Website (hiimandy.me)

- Developed using HTML5, JavaScript and CSS with the incorporation of a dynamic interface that scales for mobile and desktop users, and used graphics design elements keeping in mind the users experience to create a website that was quick, responsive and easy to navigate
